Full-Stack JavaScript Developer

Programming Languages

Photoshop Figma
Html/Css
JavaScript
Node.js

Frameworks and Databases

Express.js MySql
React.js
jQuery
Firestore
Mongodb

Technologies and Api's

Heroku Stripe
Google Maps
Gmail
Git & Github
CLI

Education

Robinson High School
1999-2003

About Me

Hi, I am a Full-stack JavaScript developer with a strong understanding of vanilla programming. I major in JavaScript & Node.js, but I also have a firm comprehension of photoshop & html/css. I have over 3 years of experience using photoshop, html/css, JavaScript & node.js. I am also efficient in express.js & react.js as well as many other technologies.

Professional Experience

Junior Systems Administrator

2020 - covid

Florida Orthopaedic Institute - Tampa, FL

Maintained, expanded, and updated a main application's user interface as well as database. Wrote documentation for team members and administration on how to use the app. Wrote code to assist in the transition of the application to web based SAAS. Assisted doctors, nurses & staff in the use and troubleshooting of issues in the application.

Projects

WebPlayground

2020 - present

Node.js, Express.js, MongoDB, Web Components, Html/Css, JavaScript, Adobe XD

My personal blog for documenting the technology, apis & code I am currently using or have used. It is built with the express MVC scheme.

The Plant Based Experiment

2019

Photoshop, Html/Css, JavaScript, Node.js

A website made for a vegan based diet. It is fully responsive, has a mobile menu, a faq section with an accordion slider and a mailer script that is ran with firebase functions and node.js.

Procycle

2021

Figma, Html/Css, JavaScript

An animated banner for a waste management & recycling company. Banner dimensions are 160px width by 600px height. Uses css to define the styles & properties. Uses JavaScript to make the transitions.
